

Standards for Individual and Community

Standards for an Individual

1. [Segregates waste](#) in his own home to give to community common collection (wet/dry/e/sanitary/medical)
2. Does not exceed the per capita recommendation for water ([IS1172 Standards](#) : 150-200 litres per person per day)
3. Has a [voter](#) registration card to vote
4. Takes on one civic problem in his community's adopted stretch with zeal and works to resolve it(*refer slide 3*)
5. Leads or supports upliftment opportunities "around" the community
6. Does not permit consumption of alcoholic beverages for under 21 years
7. Does something to prevent more Nirbhayas in our country

Standards for a Community

1. Segregates to highest standard and sends out less than 10% of the total garbage generated by the residents. Appoints a responsible vendor to process the community's waste. Has a permanent process to check on compliance which is crucial to sustained success
2. Has an STP, does Rainwater Harvesting and can report on per capita consumption of water at being on par with India's recommended average
3. Ensures everyone in the community is registered to vote and makes arrangements to promote voting on the day of elections.
4. Adopts the stretch outside the community and starts solving the problems on a regular steady pace by engaging the community to volunteer there
5. Adopts nearby stray dogs and gets them neutered while educating the community
6. Solves the Traffic congestion on their stretch by doing what it takes – be it appointing special wardens at peak hours, moving bus stops or installing new medians.
7. Has active programs to initiate change in the mindset of Whitefield's men across all socio economic classes for the safety and empowerment of our women.

Adopted Stretch Responsibility

1. Safe and clean pedestrian friendly pavement garbage and hole free.
2. Traffic flowing smoothly. Other than volume of cars, no other external effect on the traffic. Eg: Pot holes, Rules broken by BMTC or other buses, illegal parking etc. Community can improve it!
3. BESCO transformers are safe and neat
4. Cable wires not careless and dangerously hung
5. Pavement trees bricklined and surrounded by low geraniums, grass or other flowers
6. Open plots addressed
7. Any other problems specific to the stretch addressed with compassion and respect to all stakeholders of the public space.
