

PLEASE DO NOT THROW AWAY MILK/ JUICE CARTONS. WE NEED THEM!

STEP 1 - Fill the used carton to one third its volume with tap water.

STEP 2 - Close the carton's opening, shake well to rinse and pour out the water. Repeat till water runs clear.

STEP 3 - Open the glued tabs on both sides and at both ends, the top and the bottom.

STEP 4 - Flatten the carton.

STEP 5 - Leave it aside with the opening at the bottom to drain out and dry.

STEP 6 - stack the dried cartons in empty carry bags or cardboard boxes till collection date or drop the filled bags and boxes at designated collection points in the neighbourhood.

THE NEXT STEP - After a rewashing, sanitising and drying routine.....

...these cartons are cut, woven and upcycled at a women's Self Help Group....

...into attractive bags, bins and baskets that are as strong and long lasting as the original milk/ juice cartons themselves!

NOW YOU KNOW HOW EASY IT IS TO MAKE A DIFFERENCE. C'MON, JUST DO IT!
