

WHITEFIELD FOR ANIMALS

We Are Strays (WAS)

The WAS Model

Awareness

1. About benefits of Indi Dogs and necessity for co-existence
2. Available support from the NGOs
3. Talks from the NGO representatives to the association
4. Propose the easy sustainable model for the community
5. Define Responsibilities

Sterilization

1. Identify the NGO of our Zone
2. Partner with that NGO
3. Get comfortable with the dogs to assemble them at a point
4. Volunteer to assist the NGO to avoid relocation

Vaccination

1. 1 ARV + 1 distemper shots at the time of sterilization
2. Collect the Vaccination Cards for these identified dogs
3. Follow up yearly ARVs with the partner NGO

End of Stage 1

*Identified the communities willing to adopt
&
Sterilization + Vaccination complete for the identified
use cases*

Responsibilities of the Association

1. Identify a responsible POC in the association for WAS program
2. Identify a feeding post outside the gate
3. Allocate some nominal funds
4. Spread awareness among the residents
5. Encourage volunteers to join WAS – volunteer templates to be provided
6. Encourage Donations / sponsor a dog program
- Post the 80G tax exemption details for money spent with WAS
7. No relocation/manhandling of dogs allowed

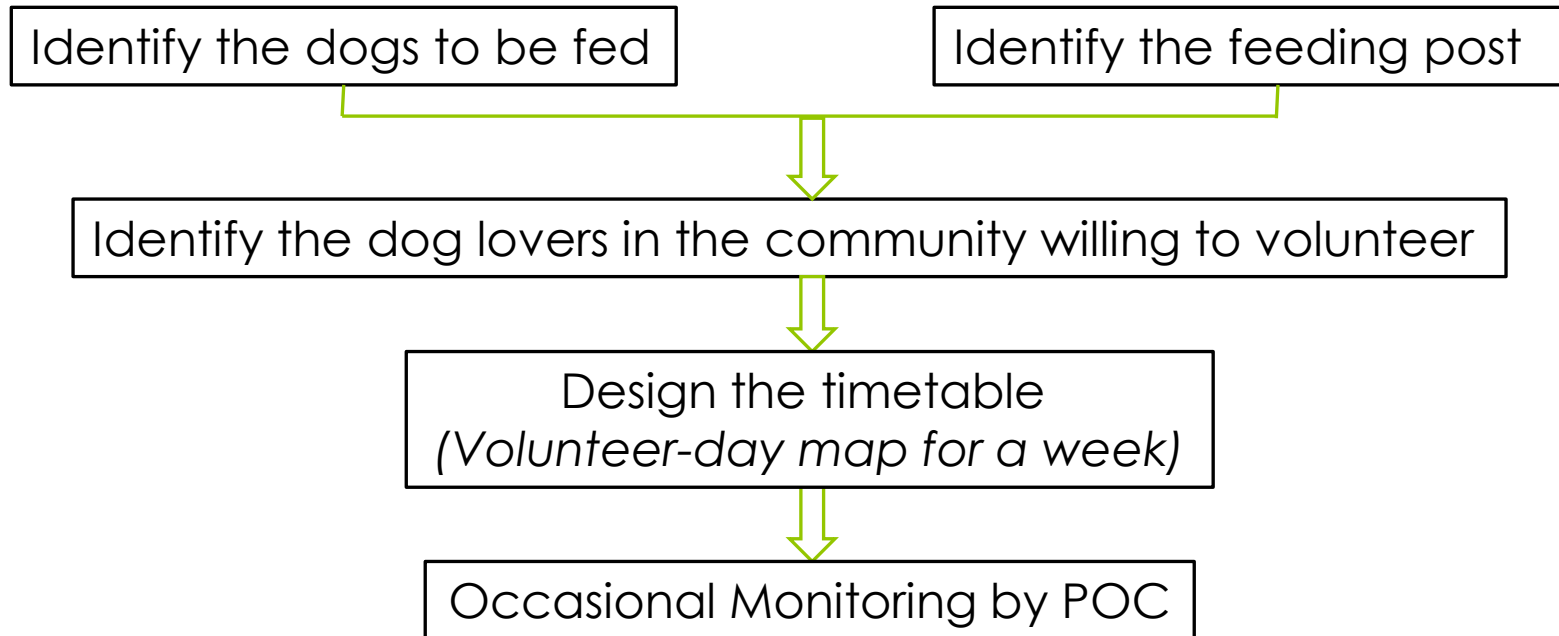

Responsibilities of the POC

1. Monitor the feeding scheduled
2. Be aware of the partner NGOs, their helplines and processes outlined
3. Immediate attention in case of emergency
4. Maintain the vaccination card and track the due dates
5. Secure nominal funds
6. Identify a substitute in case of absence

The Feeding Post Basics

1. No bowls
2. 1 big meal a day - fix a time
3. Where ? – outside the gate
4. What ? – Rice and meat waste boiled (pet dabbas available at Canine Cuisine)
5. Cost ? – Around Rs 250 / dog / month
6. Feed the dominant dog first
7. Money spent on food / sponsor a dog – tax exempted under 80G

The Feeding Post Model

End of Stage II

*Self Sustaining Feeding posts set up for the identified
communities
&
Interested volunteers Identified*

Emergency Rescue Protocol

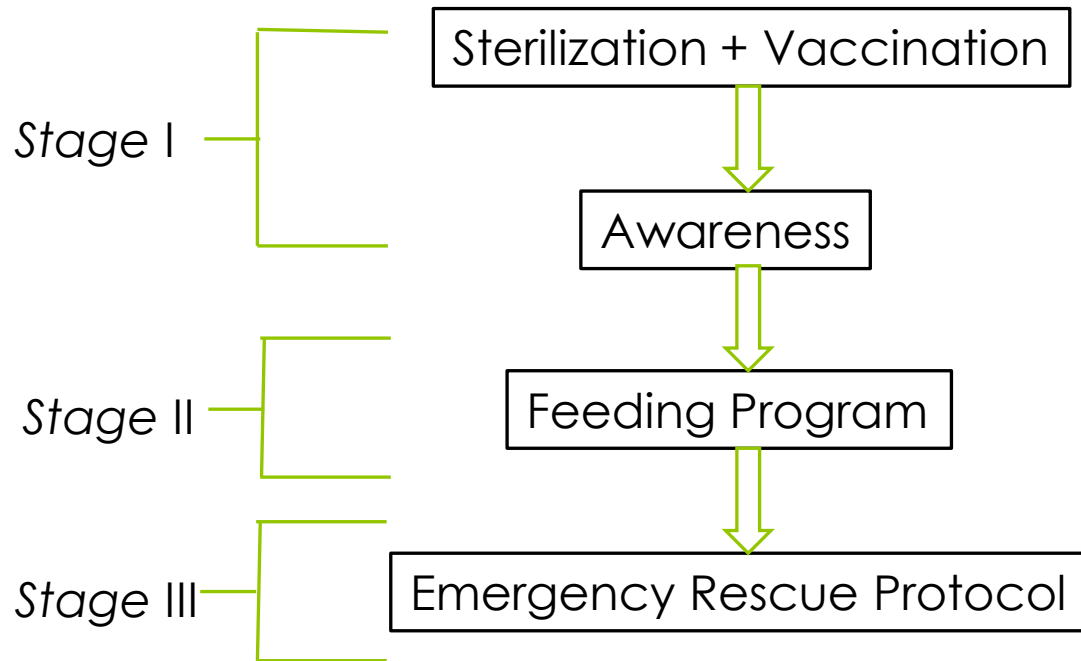

Form a WAS volunteers group for emergency rescue –

1. Emergency protocols
2. Immediate closest vet care
3. Transports
4. Hospitalization
5. Fosters

End of Stage III

Empowered to handle emergencies

The Model - Revisiting

What Now ?

1. Address Suzie's dog with Stage I solution
Get the stats (#dogs, #males, #females, behavior)
2. Identify 2 cooperative communities to pilot the model

What Next ?

1. Divide the Varthur road stretch into zones (per sq km) and implement the model with identified volunteers/associations in these zones
2. Continued Awareness campaigns about adopting Indi dogs - Stray puppies Adoption camps
3. Publicity Camps to raise funds
4. Sponsorships from corporates
5. Adopt the besties from the Bombay success story and more

WHITEFIELD FOR ANIMALS

Wildlife

A growing Need

Birds

Snakes

Terrapin

Squirrel

Monkeys

Mongoose

WHY ?

Whitefield
200 species of insects
53 species of birds

Monkey Catching – very high
costs involved

Wildlife Rescue by authorized rescuers involves a cost factor

Relocation is not a solution

sustainable way of wildlife management

Gerry Martin

Sumanth Madhav

Handling the situation is easier than we imagine

Community Conservation Model

Relocation is not the solution

1. Awareness Programs – to the residents and guards
 - Identify the species
 - Handling the situation
 - Basic first aid
2. Urban biodiversity Study on conservation for kids
3. Get volunteers authorized from government

WHITEFIELD FOR ANIMALS

Thank You !!!
